

# MINI RATCHET & TOOL CASE NON-TOUCH

- COMFORT
- ERGONOMICS
- MULTIPLE-PURPOSE
- DURABILITY

• The stainless bit holder can be used for a variety of sizes 4mm bits.

• Mini ratchet.

FEATURE:

- Non-Touch is an innovative tool box. With the aesthetic and ergonomic design, it can fit in the palm and stay comfortable while holding.
- When the lid is open, the bits fixture rises along with it. With the special latch design, the user can easily grip the bit upright by rotating the tool handle and after use, the bit can be simply pulled out by putting back to the storage.
- The front end of the box has a storage space for the handle. When closing, the two latches inside of the lid firmly withhold the handle as a locking device. If the handle is not in place, the lid can't be closed. It will remind the user not to loose the product after use.
